Classic Series

Whether for a new building or renovation of an existing space, customers want lighting solutions that provide quality of light and substantial energy and maintenance savings. The new Classic Series range of LED products can be used to replace functional luminaries in general lighting applications. Non-dimming triac-dimming 0-10V, DALI are now available. The process of selecting, installing and maintaining is so easy – it's a simple switch.

Anti-Glare Series

Currently, virtually all new and modernized buildings are looking for lighting solutions that provide high-quality light with low energy consumption and low maintenance costs.

New Anti-Glare Series LED luminaires will be the right products. Installing and maintaining the luminaires was maximized simplified.

The most important thing is to protect our eyes with UGR<19.

Polarized light

- Series design, deep anti-glare design, effectively reduce glare.
- The module rotates 355° horizontally and 60° vertically to meet different illumination angles.
- Narrow border/no border design, perfect combination of lighting and installation ceiling, enhance the consistency of space vision.
- The light body can be freely stretched downward upward to meet the high demand of different layers

Adjustable telescopic spotlight

Optional light effect accessories can be used to create different lighting effects.
Can be combined with Linan series, light efficiency, flexible one without leakage.

1 Press-type fixed buckle, so that the lamp body is not easy to loosen, maintain a fixed state.

2 Fixed chuck with height adjustment, so that the lamp body can be fixed in the middle without slipping.

3 Various specifications are available, 1/2/3/4 lamp holder, reasonable installation structure can make the ceiling simple, natural and visual.

BEAUTY OF DIFFERENT COLORS

LIGHT-EFFECT ACCESSORIES

Honey Comb

Excessive soft edge light source effect, effectively prevent excessive astigmatism, let direct light through, thereby preventing glare, eye protection, anti-glare UGR less than 16

Frosted Filter

Ground glass filters out soft light and further enhances the diffuse effect of light, thus reducing the possibility of glare and providing a uniform and soft light environment.

Rhomboid Filter

Square spot, through atomization or diffusion, make light evenly diffuse more soft, thereby reducing the stimulation of lamps to the human eye, achieving antiglare effect, and generally both have optical beam expanding effect.

Fringe Filter

The stretching stripe spot can be stretched horizontally or linearly according to the direction, and the function is to stretch the circular spot into elliptical spot. It can concentrate the spot in one direction, illuminate the widest possible area in that direction, and reduce the waste of light in other directions (mainly in the direction of ellipse short axis).

COMBINATION

Combination, more than one

Family mold design, improve the versatility of the lamp module, achieve a multi-purpose lamp; Can be combined with Linan series, light efficiency, flexible one without leakage.

Split structure

1 The stretching lamp holder contains a height adjusting fixing chute. The lamp body can be fixed in the middle without slipping.

2 Rotating clasp with positioning groove for fixing rotation angle to make lamp adjust more accurately.

3 Main body lamp body.

4 Light Source Chip.

5 Chip Bracket.

6 Nano Reflector Cup.

7 High Definition Lens.

8 Fixed front ring, optional three color replacement, white/black/gold.

- Die-cast aluminium lamp body can effectively prevent corrosion and rust, make the lamp body fully heat dissipation, improve heat dissipation efficiency.
- It can be used as IP43 anti-fog and prevent fog and spray from contacting light source. It is suitable for kitchen and toilet.
- Two optical structures: fixed direct/adjustable oblique.
- Equipped with an extremely narrow beam Angle, can be from different angles to accurately illuminate the subject.

- PK 2.0 edition only has 35mm side four-wire 2-loop guide.
- Simple structure, convenient installation, break the existing installation mode, can achieve seamless splicing, no dead corner, no dark area distribution of light scene.
- Multi-color temperature, Bluetooth or WIFI monotonic light, Bluetooth or WIFI dimming and discoloration, multi-group, scenario and other modes can be realized to reduce wiring and installation costs and achieve the purpose of intelligent light adjustment.
- 48V safety ultra-low voltage, one-line special electrical equipment configuration, clearly refers to more than 90/97, blue light hazard (<RG1), three years of quality assurance, mature stereotyping matching, safe and stable.

Magnetic profiles system

Magnetically absorbed lighting system can combine your lighting products at will according to lighting needs.

It can match floodlight lighting, key line lighting, hanging line decoration lighting, adjustable angle key lighting and wall washing lighting.

1 Supporting the original system lamp scheme developed by the Nine National Congresses, covering all space applications from point, line and surface, realizing the design of no main lamp.

2 Magnetic design for changing without any tools.

3 Sustainable Extension of Functional Plates.
